RAILING SYSTEM

Barandilla Aluminio Anodizado
Anodized Aluminium Railings

Aluminco, comenzó su andadura en el año 1982 con la expectativa de llegar al mercado con productos innovadores, de diseños vanguardistas y con sistemas de barandillas y escaleras creados en exclusiva, que daban a un producto tradicional como la fundición de aluminio, el prestigio e interés que necesitaba.

Actualmente, todo a evolucionado con productos de aluminio de última generación y Aluminco sigue mostrando su liderazgo y prestigio no solo por la calidad de sus productos, también por la calidad de todos sus procesos que en ella se llevan a cabo.

En nuestros días, esta desarrollando una industria del aluminio vertical, que procesa el aluminio en 3 fases:

- Extrusión: Con una capacidad de producción de 13.000 toneladas de perfil por año.
- Puertas & Paneles: Con una capacidad de producción de 70.000 paneles por año.
- Fundición: Con una capacidad de producción de 13.000 toneladas de perfil por año.

*Aluminco ofrece una amplia gama de productos en los que destacamos:.

- Perfiles de aluminio.
- Paneles de aluminio
- Puertas de entrada principal
- Sistema de barandillas y escaleras
- Farolas y muebles de jardín.

Con espíritu inquieto e innovador, continuamente se centra en la investigación y el desarrollo de nuevos productos y sistemas los cuáles cumplen completamente la calidad, estética y estándares de funcionalidad.

La calidad es un máximo referente en nuestra empresa y por ello certificamos nuestros trabajos:

- Con procesos de producción certificada por la norma ISO 9001 & ISO9014 y procesos específicos de pintura bajo el sello de calidad QUALICOAT.
- Certificados por el instituto internacional y organizaciones como: IFT Rosenheim, Bureau Veritas, TUV, INSTITUTO GIORDANO, ICC, EKANAL.

Realizamos múltiples soluciones y productos de forma personalizada, que cumplen con los requisitos de los clientes más exigentes.

F50

Aluminco presenta:

ALUMINCO presents its modern, stylish and fully integrated railing system. The F50 Railing System.

Su linea elegante F50 Railing System, basada en un diseño simple y elegante.

El sistema tubular anodizado esta elaborado con soportes creativos y distintivos con un alta estética, estos elementos crean una armonía que junto la belleza, elegancia hacen de ello una mirada inspiradora.

Ofrece opciones ilimitadas para aplicarlas a numerosas soluciones arquitectónicas.

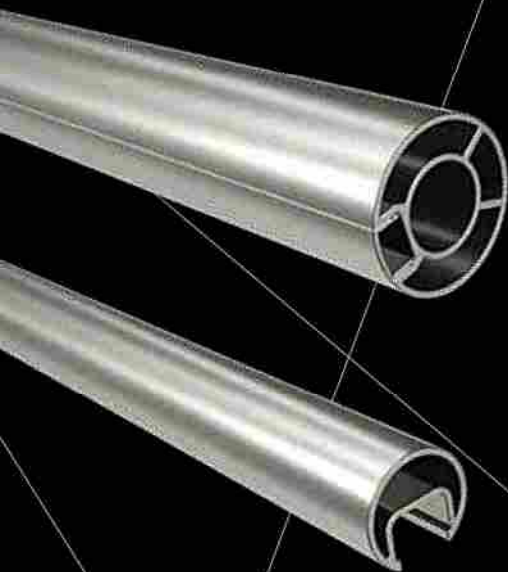

La serie tipo INOX, tanto los perfiles como los accesorios se han realizado bajo un tratamiento anodizado, producido con un espesor de 20 micras que le hacen estremadamente fuerte y a la vez inoxidable.

F50 Railing System is based on an extremely simple design and constructional concept: a tubular system of anodized or polyester powder coated aluminum, which is elaborately bonded with connectors and supports creating a discrete, distinctive and high aesthetics result.

Its metal elements fit in harmony together forming an extremely elegant, beautiful, and inspiring look. They can optionally be combined with a variety of Lexan® polycarbonate sheets or glass, offering unlimited options for numerous architectural applications.

In INOX type series, aluminum profiles and accessories have gone under an advanced anodizing treatment, characterized by unique properties: extreme hardness - second only to diamond - and unique stainless steel finish. The series offers substantial competitive advantages over stainless steel systems: high aesthetics, lightweight and lower cost.

BENEFICIOS DEL ANODIZADO:

El anodizado es un acabado único que cumple con altos estándares de calidad y tiene las siguientes ventajas:

- Gran resistencia: Vida útil extremadamente larga y sin mantenimiento.
- Resistencia al calor: Altamente resistente a los rayos UV y a las grietas.
- Fácil mantenimiento: El sistema de barandilla puede ser fácilmente limpiado utilizando agua y jabón.
- Alta estética: Apariencia similar al Acero Inoxidable.
- Bajo coste: Tanto la instalación como el mantenimiento tiene costes más bajos que el Acero.
- Seguro y duradero: El anodizado es un proceso químico no tóxico y altamente resistente al calor.

Cuidado & Mantenimiento

Para la limpieza sólo será necesario agua y un jabón suave si fuera necesario.

No utilizar productos químicos que dañen el producto.

Con que frecuencia debería limpiarse?

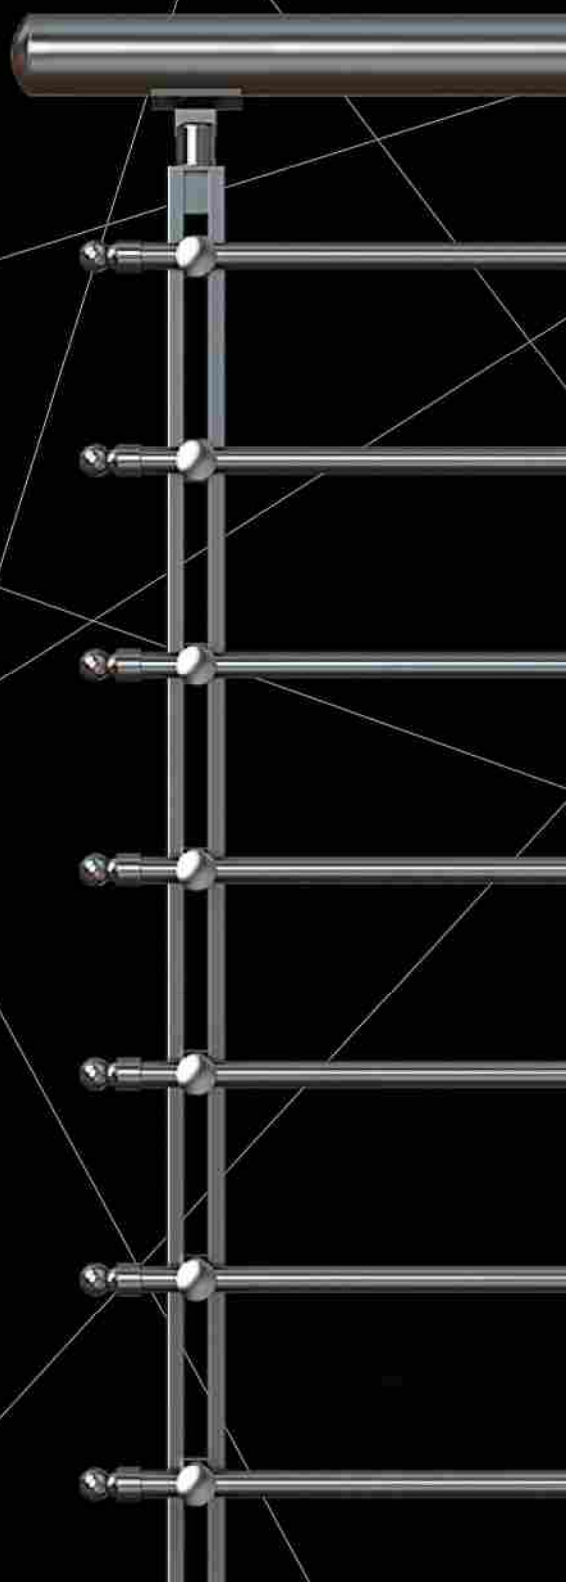

La limpieza debería realizarse 1 vez al mes cada 6 meses, dependiendo de las condiciones atmosféricas que este expuesto el modelo de barandilla F-50.

Acabado de pintura:

La pintura de poliéster en polvo protege de la corrosión y ofrece una alta estética.

En **Aluminco** la introducción del certificado de calidad QUALICOAT asegura que:

- *Crea una unidad adecuada en la capa de pintura, aprobada en este proceso.
- *El certificado obliga a poner en práctica cualquier especificación para evolucionar tecnológicamente y saber como realizarlo.

Classic European

La classica European es una barandilla que ofrece una estabilidad, ofreciendo infinidad de opciones en centros comerciales, y en edificios de todo tipo.

Classic European is an established glass railing solution, offering timeless balustrades to commercial or residential buildings where no balconies are available.

Classic European

72

Classic European

Distinguished by timeless elegance and reliable safety, Classic European railings perfectly match the contemporary needs of the end user.

El sistema clásico Europeo se coloca montandolo por un lateral, se puede fijar a la pared o el marco sin visibilidad de los tornillos. Con la opción de un carril inferior.

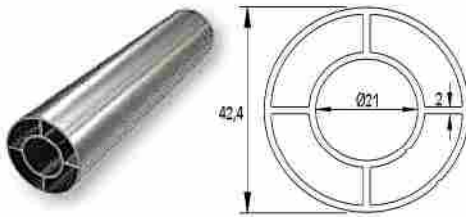

The Classic European is placed side-mounted, fixed either on the wall or the frame, with no visible bolts and wall fixings, with the choice of a bottom rail and/or the glass extended over the frame.
